## PhD Student / Postdoc opportunities Immunology of Emerging Diseases

---

Looking for highly motivated PhD Students and Postdoctoral candidates for studies of the immune response and immune memory to human pathogens. A successful candidate will be comfortable working in a dynamic environment with a multi-disciplinary research team and international collaborators, and at effectively communicating results. This role involves the development of cutting-edge technologies and exposure to medically relevant research. Experience in immunological and virological assays, molecular biology, next-generation sequencing and computer programming is a plus but not required. Positions available starting as early as in August of 2020. Please send CV with name of 2 references.
